

## 4PETHABECO

# INVITATION

*You are kindly invited  
to the event*

**WORKSHOP: Presentation of 4PETHABECO digital tool for citizen  
science**

*promoted within the project*

## 4PETHABECO

*Strengthening cooperation to address socioenvironmental challenges of EUSAIR flagship  
PROTECTION AND ENHANCEMENT OF NATURAL TERRESTRIAL HABITATS AND  
ECOSYSTEMS*

*4PETHABECO project is supported by the Interreg IPA ADRION programme under the  
Interreg Funds (European Regional Development Fund and IPA).*

*the event will be held  
day 6th May 2026  
at 2:00-3:30 PM CEST (ONLINE)*

4PETHABECO project is supported by the Interreg IPA ADRION programme under the Interreg Funds (European Regional Development Fund and IPA).

## 4PETHABECO

## Program

- 2:00 – 2:10 **Host/Moderator introduction of the project 4PETHABECO**
- 2:10– 2:30 **Citizen Science as powerful tool in Managing Large Carnivores**  
(presented by Bernarda Bele, ZRS Koper)  
*This lecture explores how citizen science provides essential, fine-scale ecological data that strengthen evidence-based management of large carnivores. By integrating local knowledge with scientific monitoring, citizen participation enhances early detection of ecological changes and supports more adaptive, community-grounded conservation strategies.*
- 2:30 – 2:50 **iNaturalist group of PETHABECO project: how everybody can contribute to straighten data of large carnivorous observation**  
(presented by Zoe Skalkos, ARCTUROS)  
*This lecture explores how the iNaturalist group of the 4PETHABECO project enables anyone to contribute reliable observations of large carnivores supporting high-quality ecological datasets. By uploading photos, tracks, or signs of presence, citizens help researchers validate species occurrences, detect habitat use patterns, and strengthen cross-border monitoring efforts.*
- 2:50 – 3:00 **Integration of iNaturalist data in 4PETHABECO Geoportal – digital tool developed by project 4PETHABECO** (presented by Martin Puhar, IGEA)  
*This lecture explains how iNaturalist observations are integrated into the 4PETHABECO Geoportal to create a unified, real-time digital platform for tracking large carnivore presence and habitat use.*
- 3:00 – 3:30 **Discussion**

The event will be held in English and is free of charge for all participants. Please be advised that first part of the session will be recorded. To secure your spot, kindly sign up using the registration form below.
